

New Product Development and Design for Six Sigma Consulting and Training

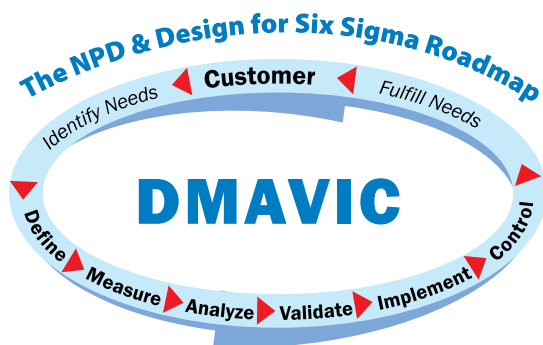

Winovia works with its clients to formulate and implement effective, *self-sustaining New Product Development (NPD) and Design For Six Sigma (DFSS) processes* tailored and customized to the client's products, industry and requirements, resulting in *increased growth revenue and profitability.*

Consulting

- **Assessments and gap-analysis** of NPD and DFSS processes; due diligence for mergers and acquisitions
- **Formulation and implementation** of effective, self-sustaining NPD and/or DFSS processes
- **Integrating design for six sigma into the product development process**
- **Strategic technology roadmapping**
- **Technical market analysis and assessments**
- **Product life cycle management** — quality by design, design controls

Training

- **New Product Development**
- **Design for Six Sigma**
 - DFSS champions training
 - DFSS yellow belt training
 - DFSS green belt training
 - DFSS black belt training
- **Change management**

- Define** — Define the business case.
Measure — Identify the technical requirements.
Analyze — Develop the product.
Validate — Pilot & validate product performance.
Implement — Launch and commercialize the new product.
Control — Operationalize the product.

Transform Your New Product Development Process

Introducing The New Product Development Assessment Tool

Winovia has developed a cost-effective, web-based New Product Development assessment tool along with Neurametrics using NeuraTool®. The objective of this tool is to:

- *Assess the sustainability and effectiveness of a company's new product development process*
- *Highlight what is working well*
- *Identify areas that need improvement*
- *Benchmark with other companies*

Call Today!

Find out how an effective, customized, rigorous new product development process can help you develop differentiated products and services that result in increased growth, revenue, quality, and profitability.
