

Quality Management and Six Sigma® Consulting and Training

Winovia works with its clients to formulate and implement effective, *self-sustaining*, quality management processes tailored and customized to the client's requirements, resulting in consistent, *high quality, profitable* processes, products and services.

Consulting

- **Assessments, audits and gap-analysis** of quality systems; due diligence for mergers and acquisitions
- **Formulation and implementation** of effective, self-sustaining quality systems and/or six sigma processes
- **FDA and ISO quality systems for medical devices and pharmaceuticals**
- **Quality manuals** — assessments and development; procedures and template development
- **Quality life cycle management**

Training

- **Six Sigma**
 - Six Sigma champions training
 - Six Sigma yellow belt training
 - Six Sigma green belt training
- **Statistical methods and data analysis**
- **Minitab training**
- **Change management**
- **Six Sigma and process validation**

Winovia helps you ...

Identify improvement needs

Investigate root causes

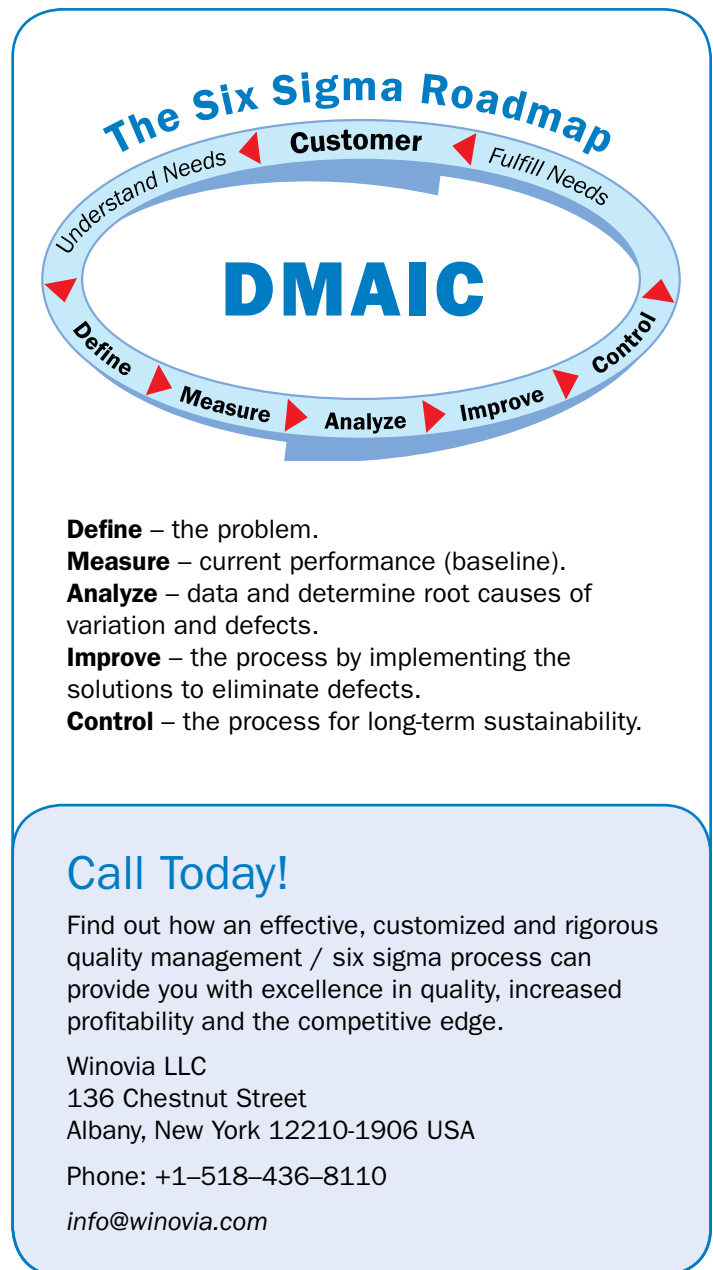

Interpret data

Isolate defects

Implement solutions

Transform the quality of your products and processes

Six Sigma® is a federally registered trademark of Motorola Inc.
©2009 Winovia LLC. All rights Reserved.

Define – the problem.

Measure – current performance (baseline).

Analyze – data and determine root causes of variation and defects.

Improve – the process by implementing the solutions to eliminate defects.

Control – the process for long-term sustainability.
